COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Sir:

Applicants gratefully note the allowance of Claims 1-8, 13, and 16-20 in the present patent application. While Applicants believe the claims are allowable, Applicants believe that the statement of reasons for allowance in this case is improper. As to each of independent claims 1 and 16, the Examiner's statement of reasons for allowance is that the prior art fails to disclose or suggest all of the limitations of these claims including some specifically identified features. Thus, this statement is ambiguous in that it suggests that each of the limitations of the independent claims are required for patentability while also implying that only specific limitations are important

with respect to patentability. As to the implication that every limitation of these claims is important to patentability, Applicants do not acquiesce that patentability resides in each identified feature or combination of features or that each feature of combination of features as recited in the claims is required for patentability, or that equivalence of any of the recited features are outside the scope of the claims. With respect to the implication that only the identified features are important to establishing patentability, Applicants do not acquiesce that patentability resides only in the specifically identified feature or that such feature is required for patentability, or that equivalence of the specified features are outside the scope of the claims. Moreover, to the extent the reasons for allowance do not separately address the additional subject matter of the remaining claims (Claims 2-8, 13 and 17-20), Applicants do not acquiesce to any inference that these claims do not present patentable subject matter independent of the patentability of the independent claims.

Respectfully submitted,

Dated: Oct 13, 2004
